OBJECTIVE

Motivated 2nd-year Information Science and Engineering student at NMAMIT, passionate about building intelligent and data-driven solutions. Seeking opportunities to apply skills in Machine Learning, Web Development, and Data Science to real-world problems while continuously growing as a software developer.

EDUCATION

NMAM Institute of Technology (NMAMIT), Nitte — Kinnigoli, Karnataka 2024 – 2028

Bachelor of Engineering — Information Science and Engineering (ISE) | 2nd Year | CGPA: 8.63

SKILLS

Languages: Python, C, C++, Java, JavaScript, Kotlin, MATLAB, Bash

Web / Frameworks: HTML, CSS, React.js, Node.js, Express.js, Flask

Database: MySQL

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Linux, Render

Data Science: NumPy, Pandas, scikit-learn, Jupyter Notebook

PROJECTS

Email Spam Detection GitHub ■

Tech Stack: Python, scikit-learn, Tkinter

- Built a complete end-to-end ML pipeline — preprocessing, training, inference and GUI — to classify emails as Spam or Ham.
- Implemented multiple ML algorithms (Naive Bayes, SVM, etc.) achieving up to 96.5% classification accuracy on a real-world CSV dataset.
- Developed a Tkinter-based desktop GUI for real-time email classification without command-line usage.

Hostel Allocation Management System GitHub ■

Tech Stack: React.js, Node.js, Express.js, MySQL, JavaScript

- Built a full-stack web application to automate hostel room allocation for students with secure login and dashboard.
- Developed RESTful backend using Node.js and Express.js with MySQL for managing student and room data.
- Implemented separate student and admin modules — students can apply for rooms while admins manage allocations.

Flask Web Application GitHub ■

Tech Stack: Python, Flask, CSS

- Built a multi-route Flask web app demonstrating server-side rendering, routing and template inheritance.
- Styled with custom CSS for a clean, responsive UI.

CERTIFICATIONS

- **Foundations of Cybersecurity** — Google / Coursera Jul 2025 ■
- **Python Project for Data Engineering** — IBM / Coursera Jul 2025 ■
- **Using Python to Access Web Data** — University of Michigan Jun 2025 ■
- **Python for Data Science, AI & Development** — IBM / Coursera Jun 2025 ■
